

News for Heavy Duty. Valeo brake pads troubleshooting guide release!

Valeo - Paris - Jul 2019. Repair and maintenance for heavy duty is getting more complex and time consuming. Workshops needs to be sharp and efficient to reduce as much as possible vehicles downtime. This requires operators to be highly skilled and always up to date. Valeo tackles this issue with an additional tool to support daily servicing tasks.

Valeo launches a [New Brake Pad fault assessment for heavy duty brake pads](#), giving a quick access to diagnosis and user information. Brake pads are one of the important cause generating downtime for heavy duty vehicles which makes the fitting process absolutely key to secure. This is even more important when a whole fleet is concerned as the effect on the Total Cost of Ownership is immediate.

This new guide - available online @ valeoservice.com/en-com/newsroom exposes everything the operators need to know concerning the 22 brake pads premature wear cases, their effects and all corrective actions or advice Valeo recommends such as:

- Checking at regular intervals that all brake disc components are functioning correctly,
- Knowing that initial braking after any brake pads replacement can be of a lower performance than usual,
- And much more ...

The Valeo brake pads troubleshooting guide enriches [Valeo Tech @ssist](#) (valeoservice.com/en-com/techassist), the e-platform at the heart of the technical knowledge of Valeo. This free web platform gives free access to a quick and intuitive part search engine in a few clicks, all technical information and on-demand training modules are now in one single place.
