

WOLF FAST TO MARKET WITH INNOVATIVE OFFICIALTECH 0W20 C6 F

Wolf Lubricants has reacted quickly to evolving market needs with the launch of its new **WOLF OFFICIALTECH 0W20 C6 F**! The new engine oil has been formulated to meet Ford's latest lubricant specification, **Ford WSS-M2C952-A1**, and the latest **ACEA C6** specification. Wolf has been one of the first companies to market with a product that meets these brand new standards.

With ongoing growth in the demand for more fuel-efficient engines and CO₂ emission reductions, automotive OEMs continue to downsize both forced-induction and naturally aspirated direct injection engines. This trend has, in turn, created the need for high-performance exhaust gas after treatment systems. With these new technologies and the corresponding shifts in industry legislation, new engine oil formulations are required to meet efficiency and emission requirements.

The research and development engineers at Wolf Lubricants have met these demanding new standards with highly innovative OFFICIALTECH 0W20 C6 F. This new engine oil is recommended for the latest **Ford EcoBlue diesel engines**, which are outfitted to a variety of models, from the **EcoSport and Focus** to the **Puma and Transit Connect**.

The lubricant is also suitable for many of the latest engines requiring ACEA C6 and has been specifically developed to extend the life and efficiency of **exhaust gas after-treatment systems**. Its unique formulation delivers **superior fuel economy** in combination with CO₂ emission reductions, **complete engine protection** and ensures **easier cold starts**.

Meeting ACEA C6 specification also means our new engine oil minimizes engine chain wear and offers effective protection against low-speed pre-ignition (LSPI) in turbocharged direct injection engines as well as against turbocharger compressor deposits (TCCD).

OFFICIALTECH 0W20 C6 F is available in 1, 5, 20, 60, 205-litre sizes. Appropriate for a wide range of modern engines, it will help workshops to streamline inventory with a high-tech single solution.

Joseph Charlot Head of Product Marketing commented: *"As one of the first to market with a product that meets the new Ford standard and ACEA 6 sequence, we are showing constant support and reactivity towards our distribution network and the market."*

Wolf Oil Corporation

Wolf Oil Corporation is a leading, independent producer of performance lubricants with over 60 years of expertise. We pride ourselves on being a pure player in our industry. All Wolf products are on-site blended in Belgium, because we attach as much importance to the quality of our products as we do to the quality of our service. Moreover, thanks to our dedicated R&D team, our on-site laboratory and our ISO certification, we guarantee the highest quality in every step of our production process. This approach gives us a unique edge within our competitive industry. We welcome the many challenges of producing lubricants of the highest quality, because no one blends technology with service like we do.
