

It is classic, make it eternal

SKF's product line for classic cars

Keep style performing. Forever

Driving a vintage car is much more than “owning” a car.

It is universally considered a complement to one’s own identity, the realization of a dream, a conquest and, above all, a source of pride and happiness.

Having a car with a long history in the garage also means the celebration of the past, giving it value, and highlighting the aesthetic beauty by **projecting it into the future.**

Driving classic vehicles becomes a **fun, rewarding and exciting gesture:** a way to disconnect from the problems of everyday life, enhancing their lifestyle.

That’s why SKF today launches SKF Classic, a new line of original products that keep vintage cars always young.

Because these are products with a history that starts from far away, that is born together with the same cars where these pieces will come to life.

SKF has accompanied the soul of these historic cars since their design and, today as then, **without ever giving up on quality and perfect performances.**

From today the professionals of the field and the lovers of these cars have at their side a new point of reference. **Again.**

SKF OE expertise on Classic cars thanks to its Automotive Heritage Premium kit:

- Complete kit content: **SKF OE bearings, fasteners, SKF Grease Technology, printed mounting instructions, certificate of authenticity for a professional repair**

- **Attractive vintage design** and optimized components protection
- **Specific packaging** including customized wedges for bearing diameter which is **unique in the market**
- Certificate of original equipment parts with **SKF Quality control approval**, QR code for access to all kit information. Dedicated area for mechanic’s stamp, repair date and mileage for a complete repair traceability that will bring value to the car

- Dedicated range offer for most popular **iconic and prestigious Classic cars**
- Specific cataloguing with high-quality linkage on old OE applications for a **quick and safe part identification**
- SKF Explorer bearings with improved performance and reduced CO₂ emissions down
